XS-3100 is a PCI Express card which offers high-end ATM and IP services in a compact form factor. XS-3100 provides termination, switching and interworking capabilities from any port to any port.

XS-3100 performance and features are ideally suited for applications such as Wireless networking, Voice over Packet, DSLAM and Media Signaling Gateways.

Using the state of the art third generation Wintegra™'s WinPath3™ Network Processor, XS-3100 is the perfect interface to handle both ATM and IP simultaneously.

XS-3100 on-board dual MIPS 34K processors can run advanced protocols (e.g. 3GPP, SS7, ATM, VoIP) while the Network Processor handles all the data path.
